1. The following is an examiner's statement of reasons for allowance: The closest prior arts are Ghosez et al and Wieland et al. The two references in combination teach a process of making haloiminium salt starting from an amide and then reacting with tertiary amine. The reference differs from the instant claimed process in that the reference is not using any amide covalent linkage support which facilitates physical separation of haloenamine from a liquid composition. There is no motivation to arrive at the claimed process using the prior art teachings and hence instant claimed process is novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
